About the Creator

With over **25 years of experience** as a Senior Project Planning Manager in the oil, gas, and industrial sectors, I specialize in delivering robust scheduling and control solutions under extreme operational conditions. My tools are born from real-world challenges: no internet, limited software access, and the need for **fast, reliable, Excel-based systems** that work offline. Every product you see here has been tested on live projects and designed for **practicality, precision, and immediate impact**.
